

Abandoned Motor Winding & Nameplate Recovery Service

As part of our plans to help with strategies related to ongoing sustainability, Evans Electric Ltd. has embarked on an “Abandoned Motor – Winding, Nameplate & Performance Recovery Service”.

This will help reduce the carbon footprint, conserve energy & resources, extend operating life, enhance Efficiency, and in turn help fight Climate Change

We now offer this service on abandoned or discarded motors, HT and LT of any Make, Size, Voltage rating or Capacity, where any of the following may have occurred: -

- The Original winding has been badly Damaged/Removed/Modified/Unsuccessfully replaced, effecting performance.
- The Original name plate has been lost and the Motor's Capacity/Voltage Rating/Amps/Frequency and other details are no longer available.
- Motor wrongly rewound due to Faulty winding data interpretation/ Errors in winding detail recording/ Incorrect winding installation/ Wrong winding interconnection.
- Motor Winding terminal connections wrongly executed, resulting in faulty operation.
- Winding stripped and Motor left abandoned.
- Motors needing a change in performance requirements.
- Motors manifesting unresolved Electrically generated imbalance.
- Motors manufactured for a different Power Supply requirement.

This service applies specifically to A.C. Three Phase Electric Motors, in order to bring them back into mainstream operation.
